Technical Project

Major Project: Advance Home Security System.

Description: It is a device that has three basic modules along with a GSM modem. GSM modem is used to send the SMS whenever there are changes in any of the three modules. First module of this device detects if any person is entering inside the house. Second part of device serves the functionality of a door-latch opening using a password entered through keypad. As well as sending this data to a GSM modem through serial port. Third module uses LPG gas sensor to detect the gas leakage. If there is leakage then buzzer is turned on.

Technology: Embedded System.
